HYDROGRAPHIC SURVEY THE ASTUTE WAY
We offer **whole solutions** not simply data.

We understand that projects have many “arms” and we strive to use our expertise at every level of the project to ensure a **seamless and timely** end product.

Our most valuable asset is our **reputation for quality** and it is of utmost importance to us that **projects run smoothly**, that there be **minimal interruptions** and that our **clients are happy** with the end product.

Our Hydrographic surveying equipment and systems are **completely mobile**, allowing us the capability to work in any location worldwide.

We adhere to our clients’ timeframes and our systems are **flexible and adaptable**. We can **tailor our approach** to the specific needs of your project.

All projects are directed by a **H1 Hydrographic Surveyor**, certified by the Australasian Hydrographic Surveyors Certification Panel (AHSCP).

Our aim is to develop lasting relationships with our clients by providing knowledge, integrity and cost effective solutions.

**Bathymetric Surveys:**

- Surveying ports and harbours
- Pre, post and progress dredge survey
- Dredge positioning
- Dams, Lakes & Rivers
- Sweep surveys
- Monitoring Surveys
- Locating shoals and reefs
- Measurements of sand movements

**All post processing needs:**

- Hydrographic charts
- Contours
- Volume calculations
- Profiles
- 3-D modeling
- AVI Flythrough
- We are able to export plans and data to most CAD formats
- Data can be overlaid on hi resolution orthographic images
- Data can be exported to most GIS platforms
FAST
We use leading edge Hydrographic Survey equipment which is owned by the company, not hired. Therefore mobilisation requires no training or trial period.

We offer fast plan turnaround. Our plan formats are easy to read and understand and can be uploaded to key operators such as dredge vessels.

RELIABLE
We own the most up to the minute survey technology, offering the most accurate results. We update our technology regularly to continue to exceed the standards.

Our specialised equipment is designed to enable us to achieve accurate results in more weather conditions, minimising downtime due to bad weather.

FLEXIBLE
As a smaller company, we specialise in Hydrographic Surveying, this allows us to offer tailored and flexible solutions, with a personalised and helpful service.

As well as traditional Hydrographic Survey we also use techniques to survey break walls, pylons and wharf faces, combined with our established relationships with other marine industry professionals, to offer integrated solutions where required.
WE OFFER A **HOLISTIC AND RESULTS-FOCUSED APPROACH** BY CONTRIBUTING **INNOVATIONS AND EXTENSIVE HYDROGRAPHIC INDUSTRY KNOWLEDGE** TO THE PROJECT.
